## Overview

---

What is Rocky Mountain Power?

Rocky Mountain Power is a utility company that is pioneering a new model for existing rooftop solar customers. They are transforming thousands of intermittent rooftop solar systems into firm dispatchable grid assets by retrofitting each home with a sonnen battery.

How much solar power does Rocky Mountain Power produce?

Rocky Mountain Power's 50,000 solar customers currently produce an estimated 300 MW of solar. While that's only about 10% of the utility-scale solar capacity, it was a sufficiently large enough resource to target with batteries in a retrofit program.

Does Rocky Mountain Power sell solar panels in Utah?

Rocky Mountain Power is the largest electric company in Utah, serving 75% of the state's territory. Customers who install solar panels with an energy storage system can utilize the Wattsmart Battery Program, which offers the following benefits: An upfront rebate of \$400 per kilowatt of battery capacity, covering up to 70% of equipment costs.

Does Rocky Mountain Power offer a solar battery incentive?

Rocky Mountain Power (RMP) offers an incentive for solar customers who install solar batteries. This incentive helps the power company manage the grid more effectively and can save them money. (Now operating under PacifiCorp).

How do solar batteries work at Rocky Mountain Power?

The batteries are auto-dispatched from the utility control room based on the hierarchy of system needs. Rocky Mountain Power's 50,000 solar customers currently produce an estimated 300 MW of solar.

Is Rocky Mountain Power a public utility?

Rocky Mountain Power is the only rate regulated public utility providing electric service in the state of Utah. Rocky Mountain Power has over 800,000 customers in Utah and serves about three fourths of the geographic area of the state and a larger percentage of the state's population.
