

Roof photovoltaic bracket grounding method

Overview

System Overview Technical Specifications Assembled View Component View Assembly Details .

Below is a brief summary of the technical specifications of the IronRidge Ballasted Roof Mount platform. More detail will be provided in the following.

IronRidge provides a comprehensive platform for designing a wide variety of photovoltaic systems for ballasted roof mounting applications. Due to its modular architecture, it can handle nearly all commercially available PV.

The solar array of a can be mounted on , generally with a few inches gap and parallel to the surface of the roof. If the rooftop is horizontal, the array is mounted with each panel aligned at an angle. If the panels are planned to be mounted before the construction of the roof, the roof can be designed accordingly by installing support brackets for the panels before the materials f.

Product Introduction

- Scalable from 10 kWh to 50 kWh
- Self-Consumption Optimization
- Integrated with inverter to avoid the compatibility problem
- LFP battery, safest and long cycle life
- Stackable design, effortless installation
- Capable of High Power
- Emergency-Backup and Off-Grid Function

How To Choose Roof Photovoltaic Brackets

If your roof is tile roof, usually also choose the additional type. Different from the steel roof, the tile roofs usually use different types of hooks to connect the solar panels to the ...
