

# Rooftop photovoltaic panel laying process

## Overview

---

Can a solar panel be installed on a roof?

Yes, solar panels can be installed on a roof. With systems like Marley SolarTile®, the solar panel acts as the roof covering, reducing installation time. On retrofit projects, simply remove a section of tiles and install the solar panels in their place.

How long does it take to install solar panels on a roof?

Installing ground-mounted solar systems requires special permits and allowances based on location, and the process can take from a few days to several months. Solar panels on roofs have ensured affordability and accessibility in solar energy usage. However, it is necessary to be aware of the precautions before installing. Here are a few:

How do you prepare a roof for solar panels?

The first site prep step is checking your roof's condition and which way it faces. Look at the roof's age, how strong it is, and its materials. Make sure your roof is strong enough for solar panels and in good shape to hold them up. Also, think about how the roof is positioned. This affects how well the solar panels work and make energy.

How do solar panels attach to a roof?

Installers fix solar panels to a roof by lifting up some roof tiles and attaching mounting brackets to the rafters, before carefully placing the tiles back where they were. They'll then attach rails to these brackets, before locking solar panels into the rails.

What is a roof-mounted solar panel installation?

Roof-mount solar panel installations are less intrusive and invasive, and there is no need for extensive pre- and post-installation work or construction. Roof-mounted solar panels add aesthetic appeal and blend seamlessly with roofs,

making them ideal for residential rooftop surfaces.

How do I install solar panels?

The first step in the solar panel installation guide is to install the mounts that will support the solar panels. These come in three primary types: pole, roof-ground, and flush mounts. Depending on the chosen mount, you can place solar panels on an RV, a rooftop, or even as a standalone device.
