

Samsung lithium ion battery 48v

Overview

What kind of battery does a Samsung bike use?

This is a 48v 14Ah Li-ion In-Frame Battery with USB, which is used in Samsung electric bikes. It features Samsung's most advanced Lithium-Ion cells, a USB charging port for your phone, and an integrated battery meter.

Are Samsung lithium-ion cells good for electric bike batteries?

Samsung lithium-ion cells are superior for electric bike batteries due to their exceptional performance and reliability. These cells are renowned for their high energy density, meaning they can store more energy in a smaller and lighter package, resulting in longer riding distances without adding extra bulk to your electric bicycle.

What is a silverfish battery?

The electric bike silverfish battery: Sleek, compact, and reliable power source designed for electric bicycles. Efficient, easy to install, and long-lasting for uninterrupted rides.

What are the features of Samsung battery charger?

- Powerful: 48V 13Ah - Made with 18650 Samsung Lithium Ion cells.
- Long Lasting: Charging cycles over 1000 times.
- High Quality: Battery is UN.38.3 certified. Charger is UL certified.
- Smart Components: The circuit board comes with Battery Management System to keep battery safe.

Why should you buy a Samsung ebike battery?

This ensures that your ebike battery maintains its performance over time, giving you peace of mind and reducing the need for frequent replacements. With Samsung lithium-ion cells, you can enjoy extended rides, dependable power, and overall enhanced Electric bike experience, making them the preferred choice for discerning riders.

What is the discharge capacity of Samsung inr21700-48g battery?

Samsung INR21700-48G battery's discharge capacity test results: At 0.2C discharge the capacity is in the middle from minimum to typical specified by Samsung. The capacity remains >4600mAh all the way up to 10A. Curves don't have any sudden drops. Samsung 50G vs 48G (green) vs 50E The results of 50E i took from my tests published before.
