

Sense solar home energy monitor

Overview

What is a sense home energy monitor?

Before the advent of energy monitors, you'd be out of luck. The Sense Home Energy Monitor, like other home energy monitors, works to solve that problem. If you have solar panels installed, Sense and other solar-compatible home energy monitors can also help you compare your electricity use to the amount you're generating at any given time.

How much does a sense monitor cost?

The device is listed at \$299, or \$349 for the solar-enabled model. When you install the Sense monitor, the device will immediately start reading your electricity use. As it reads the data, it will recognize the "electricity signatures" associated with your home's appliances. Each appliance you have in your home uses electricity in a unique way.

What is a home energy monitor?

The Home Energy Monitor installs in your home's electrical panel and provides insight into your energy use, and home activity through our iOS and Android apps. Sense identified a bad furnace relay. It saved me \$750 By the end of the Summer we had a \$900 power bill!.

Is a sense home energy monitor worth the investment?

If you have a habit of leaving the oven on for hours after you're done cooking, this feature alone might make a Sense worth the investment. When you order the Sense Home Energy Monitor, you'll receive the monitor, an antenna, current sensors, and a power cable out of the box.

What is the sense Solar bundle?

The Sense Solar Bundle will allow you to track the electricity you're using as well as the energy you're generating. Installing an energy monitor during your solar installation will allow you to make the most of both investments.

Why should you use a solar energy monitor?

If you have solar panels installed, Sense and other solar-compatible home energy monitors can also help you compare your electricity use to the amount you're generating at any given time. That means you'll know exactly when to schedule activities requiring a lot of electricity and could learn how to decrease your electricity use at night.
