

# **Sk innovation solid power**

## Overview

---

Solid Power and SK Innovation sign a memorandum of understanding and joint development agreement with intent to manufacture all-solid-state cells using Solid Power's proprietary electrolyte for automotive qualification testing. Partnership intended to validate battery cell development and production process as Solid Power works toward commercialization of its all-solid-state cells and electrolyte materials. SK Innovation plans to work with Solid Power to further develop Solid Power's all-solid-state. What is SK Innovation's Partnership with solid power?

SK Innovation today announced a partnership with Solid Power, an industry-leading developer of all-solid-state battery cells, to develop all-solid-state batteries under a memorandum of understanding ("MoU") and joint development agreement ("JDA") on Oct. 28, 2021.

What is SK Innovation doing with EV batteries?

In addition, SK Innovation committed to a \$30 million investment in Solid Power, a company that's attracting attention for leading this new area of battery technology. Earlier this year, Ford and BMW announced investments and development agreements with Solid Power. The Next Big Leap for EV Batteries.

Will solid power and SK Innovation develop solid-state batteries?

In a recent press release from Solid Power, the company announced a memorandum of understanding with SK Innovation to jointly develop solid-state batteries using the former's proprietary sulfide-based solid electrolyte.

Will SK Innovation buy solid power?

SK Innovation also commits to make a USD 30 million (approximately, KRW 35.325 billion) investment to acquire a stake in Solid Power. Solid Power is known as a leading developer of all-solid-state batteries.

Will SK Innovation & solid power co-develop all-solid-state batteries?

As part of the agreement, SK Innovation and Solid Power will co-develop all-solid-state batteries. They also plan to validate that Solid Power's all-solid-state-cells can be manufactured on existing lithium-ion battery manufacturing equipment.

Will solid power supply SK Innovation electrolyte?

Solid Power plans to supply SK Innovation with its proprietary electrolyte for use in the manufacturing of all-solid-state cells. Under terms of the JDA, Solid Power expects to generate a small amount of revenue from both research and development and from the sale of electrolyte samples beginning in 2022.

### **Solid Power and SK On Deepen Partnership with New Agreements**

Solid Power and SK On enter into new agreements John Van Scoter, President and CEO of Solid Power, and Minsuk Sung, Chief Commercial Officer of SK On, shake hands after entering into new agreements.

### **SK On to exhibit latest battery lineups at CES**

SK Innovation Co., SK On's parent firm, invested US\$30 million in Solid Power to produce all-solid-state batteries. This photo, provided by SK On Co. on Dec. 26, 2022, shows the S-Pack, a cell-to-pack technology ...

### **SK Innovation and Solid Power partner to produce automotive**

SK Innovation joins Solid Power to develop solid-state batteries. In a recent press release from Solid Power, the company announced a memorandum of understanding ...

### **Ford Commits to Manufacturing Batteries, to Form New**

Ford and SK Innovation announced today they have signed an MoU to create a joint venture - to be called BlueOval SK - to produce approximately 60 GWh annually in traction battery cells and array modules, starting mid-decade, with

potential to expand.

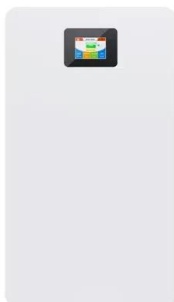

### **Solid Power Partners with SK Innovation to Jointly Produce All ...**

Solid Power and SK Innovation sign a memorandum of understanding and joint development agreement with intent to manufacture all-solid-state cells using Solid Power's ...

### **Solid Power Inc.**

Solid Power has extensive partnerships with both BMW and Ford to jointly develop all-solid-state batteries. In October 2021, Solid Power announced a partnership with SK Innovation to produce Solid Power's automotive-scale all-solid-state battery cells utilizing Solid Power's sulfide-based solid electrolyte, proprietary cell designs and production processes.

### **SK On strengthens partnership with Solid Power to accelerate**

SK On, a leading global electric vehicle battery manufacturer, will strengthen its partnership with Solid Power, a U.S.-based leading developer of solid-state battery technology, to accelerate the development of all-solid-state batteries (ASSBs).

### SK Innovation reinforces its solid-state battery patent

In addition to solid-state batteries, SK also placed its pawns in NMC cathodes and silicon anodes over the last decade. Like most battery manufacturers, SK Innovation/SK On commercializes pouch cells with NMC chemistry. In 2021, SK Innovation and LG Energy

### Solid Power partners with SK Innovation to produce solid-state

Solid Power has partnered with SK Innovation to manufacture automotive-scale all-solid-state batteries using Solid Power's sulfide-based solid electrolyte, proprietary cell designs and production processes. SK Innovation has also agreed to invest \$30 million in Solid Power. The two companies will cooperate on cell development, validation and production in order to ...

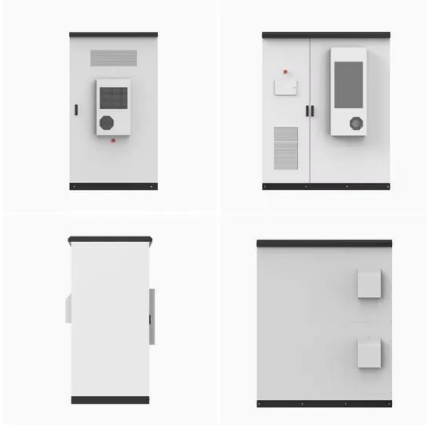

### SK On bindet sich enger an Feststoffbatterie-Firma Solid Power

SK On schloss bereits 2021 eine Entwicklungsvereinbarung mit Solid Power ab und investierte zu diesem Zeitpunkt auch 30 Millionen US-Dollar in das in Colorado ansässige Feststoffbatterie-Unternehmen.

### South Korea's SK Innovation to invest \$30 mln in Solid Power

SEOUL, Oct 28 (Reuters) - South Korea's SK Innovation (096770.KS) will invest \$30 million in Ford Motor-backed solid-state battery developer Solid Power Inc, with an aim to jointly

### Solid Power Partners with SK innovation to jointly ...

Solid Power, (the "Company" or "Solid Power"), an industry developer of all-solid-state battery cells for electric vehicles, in the process of merging with Decarbonization Plus Acquisition III ("DCRC"), announced a partnership with ...
