With lithium under scrutiny, sodium-ion offers safer, scalable and region-specific promise for EV and grid storage markets. Rajasthan-based Indexel Engineering has partnered with US technology firm UNIGRID to introduce 50 MWh worth of sodium-ion battery systems to India.

Stationary battery energy storage system: As of March 2024, India had already installed approximately 219 mega watthours (MWh) of grid-scale BESS,28 with tenders for about 18 GWh of grid-scale BESS either active or awarded.29 Further, there are plans for a significant expansion in grid-scale BESS, with CEA projecting a capacity requirement of . Will battery based energy storage outperform projections in India?

Be it lower cell costs in China, or a shift to BOO from BOOT, or even better local expertise, battery based energy storage is on a strong wicket to

outperform projections In India.

Could sodium-ion battery technology be an alternative Bess technology?

Developing alternative BESS technologies. Sodium-ion battery (SIB) technology can potentially address the concerns surrounding LIBs and emerge as an alternative BESS technology. SIBs benefit from limited reliance on critical minerals and improved safety parameters, among other traits, and are particularly suited to meet B.

Is energy storage a mini-disruption in India?

In the past three months multiple BESS (Battery-based Energy Storage system) tender results have pointed to yet another mini-disruption in the fast-evolving Indian renewable energy sector. Energy storage targets for 2028 might be a lot closer in 2026 itself.
