

Solar Power Plant Latest News

Overview

How many new solar farms have been approved?

Three new solar farms have been approved. Pic: PA The government has approved three new solar farms, that could power more than 400,000 homes, according to estimates. Energy Secretary Ed Miliband has approved the plans for projects at Mallard Pass, Rutland and Lincolnshire, Sunnica in Suffolk and Cambridgeshire, and Gate Burton in Lincolnshire.

Will the New Labour government approve a new solar farm?

The new Labour government has pledged to approve many new infrastructure projects - including on green energy. However, MPs impacted by the changes have already raised concerns. Three new solar farms have been approved. Pic: PA The government has approved three new solar farms, that could power more than 400,000 homes, according to estimates.

Can a solar farm power 115,000 homes a year?

A solar farm and battery project capable of powering 115,000 homes annually by delivering up to 500 megawatts (MW) of electricity is being proposed by an energy developer. Island Green Power said the project, known as East Pye Solar, is planned for land in Long Stratton, Norfolk, and will be able to provide energy over the next 60 years.

How much energy will a solar farm produce?

According to the Department for Energy Security and Net Zero (DESNZ), the projects could create a total power of 1.4GW - enough to power 406,994 homes. In total, the farms will cover 2,837 hectares. Mr Miliband said: "Solar power is crucial to achieving net zero, providing an abundant source of cleaner, cheaper energy on the mission towards 2030.

Could a 60GW solar power increase the cost of electricity?

Engineering and consultancy firm AFRY has been appointed as the technical

partner for a solar project under development by Neoen in Ireland. The UK's solar energy trade body has released an analysis suggesting that raising the UK's solar generation capacity to 60GW by 2030 could significantly lower the cost of electricity.

How much solar power will the world have by 2023?

The global solar market is burgeoning, and it's predicted that the world will have 1 trillion watts of installed solar PV capacity by 2023.
