

Solar companies medicine hat

Overview

Does Medicine Hat have solar?

Medicine Hat has some of the highest solar PV potential in Canada! 1 kW of solar here can produce up to 1,500 kWh of energy annually. An average Alberta home consumes 7,200 kWh per year which can be produced in Medicine Hat with a 4.8 kW solar array at an 8/12 pitch to the South. Curious what solar costs?

.

Why should you invest in solar power in Medicine Hat?

With Medicine Hat experiencing close to 314 days of sunshine a year, you can see why investing in solar power is beneficial. With such a high potential for solar energy, you will be able to generate your own power, save money on your monthly bills, and reduce your carbon emissions.

Does Medicine Hat have a solar rebate?

Medicine Hat has a solar rebate for residential customers that will help your system pay back even faster. We often hear people talking about the solar plant in Medicine Hat that was recently decommissioned. That plant was solar thermal, not a solar PV facility and is different than the solar that is now overtaking our province in a storm.

Who will install my solar PV system?

Empower Energy's team of qualified electricians and installers will install your solar PV system to the highest standards while meeting and exceeding all applicable codes and regulations. Empower Energy will supply all the components required to install your turn-key solar PV system.

What is Saamis solar?

Saamis Solar is a 325 MW solar power project under development on an

approximately 1,600-acre site within the city limits of Medicine Hat. Medicine Hat boasts more days of sunshine per year (330!) than any other city in Canada and the Saamis Solar project is situated in the north-eastern industrial sector of the city.
