

Solar energy research institute seri

Overview

What is Solar Energy Research Institute (SERI)?

Solar Energy Research Institute (SERI) was established on 1st July 2005. It was formed to address the immediate issue of fossil fuels consumption that causing environmental pollution and global warming. Fossil fuels are limited in supply. Moreover, rapid depletion of these non-renewable resources has resulted in the increase of fossil fuel prices.

Why is Seri a leading research institute in solar energy?

As a leading research institute in solar energy, SERI plays a crucial role in driving sustainable development and promoting the adoption of clean energy solutions. Its significant research contributions and technological advancements position SERI as a prominent hub for solar energy research and innovation in the region.

What is Singapore's Solar Energy Research Institute (Seris)?

As the national solar energy research institute, SERIS is one of the pillars of Singapore's efforts towards reducing its greenhouse gas emissions and carbon intensity.

What does Seri stand for?

The Solar Energy Research Institute (SERI) of UKM has been rigorously working to promote Solar Photovoltaic Technology in this region ever since its birth in 2005. This site can be accessed using smart devices. Best viewed using the latest versions of web browsers on a minimum resolution of 1024x768. Last Update: 19/08/2024 MALAYSIA.

What does Seri do?

SERI's research primarily focuses on enhancing the efficiency, reliability, and affordability of solar energy systems. Researchers at SERI delve into various aspects of solar energy, spanning advanced photovoltaic (PV) technologies,

solar thermal systems, energy storage solutions, and grid integration strategies.

When was the solar energy research institute established?

1974: The International Energy Agency is founded to study and forecast energy markets. 1974: The U.S. Energy Research and Development Administration (ERDA) is created in order to foster the commercialization of solar energy. 1977: The Solar Energy Research Institute is established by Congress.
