

# Solar generator tripped

## Overview

---

To save you waiting for us to get to you and the possibility of a call out fee if the fault is not covered by any warranty, it's worth going through a few checks of your own first. Here's what you need to do: 1. The classic IT 'Powercycle' is always a good start, turn all the switches off, leave it 30 seconds and turn them all back on.

If none of the above gets your system back up and running then we can help. To speed things up and help us get to the problem with the least.

## Solar generator tripped
