

# Solar panel payments

## Overview

---

Solar panels pay typically for themselves in less than 10 years. The average homeowner doesn't necessarily have \$20,000 - \$30,000 on hand to pay for solar panels, which is why taking out a solar loan is one the most common ways to finance a solar energy system. How do I pay for a solar system?

The two most cost-efficient ways to pay for your solar system are through a cash purchase or a solar loan. Generally speaking, these two options are the best way to go solar because you either own your own system right away or by the end of your loan.

Should you pay for solar panels with cash?

Paying for your solar panel system with cash is the best way to maximize your savings from solar. You won't pay any additional interest like you will with a solar lease, and your electricity costs are taken care of for the next 25 years. You shouldn't have to pay an electric bill again - or if you do, a very small one.

How long does it take to pay for solar panels?

Solar panels pay typically for themselves in less than 10 years. The average homeowner doesn't necessarily have \$20,000 - \$30,000 on hand to pay for solar panels, which is why taking out a solar loan is one the most common ways to finance a solar energy system.

What is a solar panel loan?

Solar panel loans are similar to home improvement loans, which are used to pay for projects like remodeling your kitchen, upgrading an HVAC system, or adding a new bathroom.

How do I finance a solar energy system?

The average homeowner doesn't necessarily have \$20,000 - \$30,000 on hand to pay for solar panels, which is why taking out a solar loan is one the most

common ways to finance a solar energy system. You can also finance your solar energy system with other types of loans such as a home equity loan and or HELOC.

Should you pay off a solar loan in full?

Buyers may want you to pay off the loan in full before they move forward. Solar loans are ideal for people who plan to stay in their home for more than ten years, live in an area with high electricity costs, have decent-to-good credit, and don't have the upfront cash to purchase solar panels all at once.
