

Solar panel rental market

Overview

Given the continued, steady growth in the solar power industry over the past couple of years, it is no surprise that, according to the International Energy Agency(IEA), solar energy alone accounts for almost 60% of global new renewable capacity additions. UK solar capacity is set to double by 2030 (from the current installed).

With costs continuing to fall, we are now seeing more and more large ground mounted solar schemes being developed. More generally across the UK, 310MW of solar PV capacity was installed in the first half of 2021 with 135MW.

Landowners who are interested in leasing their land for solar power generation will need to find out if they have a grid connection located on their land or neighbouring land with.
