

Solar panel support improvements

Overview

You may be able to get a loan through the Green Deal, but you'll have to pay this back.

Experts are working to improve the power conversion rate of solar technology. Innovations such as panels using perovskites are showing promising results. A World Economic Forum report also suggests quantum computing could help design more efficient panels. Will solar power help low-income people in the UK?

It will also include installing solar panels on many social housing, helping residents on low-incomes create their own green energy to power their homes. UK Business and Energy Secretary, Kwasi Kwarteng, said:.

Can you get a grant for solar panels in the UK?

This applies to every country in the UK except Northern Ireland. From April 2023 to March 2025, 45 local authorities in England can give grants of up to £10,000 to homeowners in their area for improvements including solar panels. These grants are also available for insulation, heat pumps, double glazing, solar thermal and heating controls.

Why should you install solar panels?

Installing solar panels lets you use free, renewable, low carbon electricity. You can sell surplus electricity to the grid or store it for later use. According to low-carbon certification organisation MCS, there were more than 183,000 solar panel installations across the UK in 2023.

Are solar panels the most popular home improvement scheme?

36% of all home improvements made with HUG funding are solar panels, as of August 2024, making it the most popular measure in the scheme. But this popularity doesn't mean too much when you consider that phase two of the HUG, which was launched in April 2023, has installed just 4,543 measures in 2,588 homes overall.

Are there any government grants for solar panels?

The only active government grants for solar panels is ECO4. 'ECO4 is the latest phase of the Government's Energy Company Obligation scheme that's designed to help low-income families to save energy, make homes warmer and reduce carbon emissions', explains Nathan, Rated People.

How much money can you save with solar panels?

The average home can save more than £1,100 every year with solar panels! There are several solar panel grants and incentives currently available in the UK, aimed at reducing the cost of solar panels, your households' energy bills and encouraging the adoption of renewable energy. How much could you get?
