

Solar panel warranty insurance

Overview

What is a solar panel warranty?

Solar panel warranties vary by manufacturer and type of panel. A standard solar panel warranty should come with at least 10 years of protection. Solar panel warranties typically won't reimburse for labor costs associated with installing new equipment or shipping fees for new equipment.

Do solar projects need warranty insurance?

The warranty risk of solar must be addressed early in the development phase of PV projects, as it is not possible to buy warranty insurance later during the operational phase. Decisions taken by developers at this stage will remain important for the next 25 years.

What is warranty risk in solar?

Warranty risk in solar is correctly addressed during the PV module procurement phase. The first layer of PV warranty insurance comes with sourcing warranty-insured PV modules. The structure of the insurance should be assessed from the perspective of the project developer.

How to reduce warranty risk of solar panels?

The warranty risk of solar can be mitigated easily and cost-effectively by correctly applying existing insurance standards during the procurement process of the modules. PV warranty insurance is one key feature of de-risking PV warranties.

Does property insurance cover solar panels?

Property insurance typically covers solar system components beyond the terms of the manufacturer's warranty. For example, if a PV module fails for reasons covered by and during the manufacturer's warranty, the manufacturer is responsible for replacing it, not the insurer.

Does a solar panel warranty cover labor costs?

Solar panel warranties typically won't reimburse for labor costs associated with installing new equipment or shipping fees for new equipment. Comparisons should focus on product warranty terms, power guarantees, labor warranty terms, transferability and bankability, and the availability of an extended warranty.

Solar panel warranty insurance

Warranties and insurance

A product warranty is sometimes called a manufacturer's warranty or a warranty against defects. Solar panel product warranty For many panels, the product warranty is between 10 and 15 years. Good quality, modern panels should last for at least 20 years

[Solar panel code of practice , Swiss Re](#)

The solar photovoltaic (PV) industry typically provides warranties of 25 years on their solar panels. But this 25-year warranty poses a huge financial risk to PV manufacturers, many of which are struggling to break even. Who actually pays if the panels fail to produce what they promised five, ten or twenty-five years down the line? Will the producer still be in business?
