

Solar panels drive small fans

Overview

Yes, you can directly connect a fan to a solar panel, but you have to make sure it's the right solar panel. Solar panels produce direct current, or DC, power. In most cases, a solar inverter is needed to convert the DC power into usable alternating current, or AC, power—most appliances and electronics need AC power to run.

The AmazonCommercial 6-Inch USB Table Fan requires approximately 3 Watts of power to operate. For desk fans and other smaller fans that don't need a lot of energy, the average solar panel will be enough to pull these fans.

Solar panels drive small fans

Solar Powering 12VDC Fans! (solar panel sizing and hookup)
