

Overview

The average cost of solar panels for homes in the United States¹²³⁴⁵ depends on factors such as location, energy usage, and system size. Here are some estimates: Average cost: \$19,000 to \$27,500 before incentives. System size: A 6-8 kW system suitable for an average 2,000-square-foot home. Price per watt: Ranges from \$2.50 to \$3.50. How much does a solar panel cost?

Less efficient polycrystalline panels are typically cheaper at \$0.75 per watt, putting the price of a 400-watt panel at \$300. The cost of a solar panel also depends on how you buy it. If you purchase through a full-service installer, you will likely get a lower price for each panel than buying them individually from a retail store.

Are solar panels worth it?

Solar panels can generate major savings if you're trying to reduce your electricity costs, carbon emissions or both. The primary factor in determining whether or not solar panels are worthwhile for you is the cost you're currently paying for electricity. The higher your electricity costs, the more a solar panel system will save you in the long run.

How much do solar panels cost in 2022?

We analyzed thousands of systems sold on solar.com in 2022 to find the average cost of solar panels for homes based on their square footage of living space and number of bedrooms. On average, solar panels cost \$8.77 per square foot of living space, after factoring in the 30% tax credit.

How much energy does a solar system cost?

Before solar, this represents the average utility rate over the next 20 years, assuming annual rate hikes between 3-5% (based on location). After solar, this is essentially your lifetime energy cost divided by the total production of your system. Here's how that looks for the example system above: \$45,102 / 242,483 kWh = 18.6 kWh.

How much does solar installation cost?

Installation labor accounts for around 5.5% of the total cost of a residential solar project, according to a 2022 report from the National Renewable Energy Laboratory. That amounts to \$1,375 for a \$25,000 solar project.

How much does a solar battery cost?

The cost of solar batteries varies widely based on type and capacity. On average, a residential lithium-ion battery system, including installation, ranges from \$7,000 to \$14,000. While this represents a significant investment, the long-term savings and security benefits can make it worthwhile for many homeowners. Power Your Home With Solar
