Are commercial solar panels right for your business?

Commercial solar panels can be beneficial regardless of whether your company is large or small. Most businesses are active in the daytime, which means they are the perfect candidates for utilising solar panels and enjoying the cost savings that come with them. Let's see if commercial solar panels will be right for you.

What are commercial solar power systems?

Commercial solar power systems allow businesses to generate their own electricity directly from the sun. This transition not only reduces reliance on conventional power grids but also offers significant financial savings over time.

How do commercial solar panels work?

Imagine the sun greeting your business every morning, not just with light, but with energy to power your entire operation. A commercial solar panel system captures sunlight through photovoltaic (PV) panels. Each panel contains cells made from semiconductor materials, such as silicon, which generate electrical current when exposed to sunlight.

Are commercial solar panels a good investment?

Commercial solar panel installation can bring many benefits: Over the 25-year lifetime of solar panels, savings can equate to thousands of pounds. A 20kW system can potentially save businesses over £3,000 annually on their electricity bills. Solar panels allow for energy independence and some level of insulation from fluctuating electricity prices.

What are the benefits of commercial solar panels?

Reduced costs, energy efficiency, and energy independence are among the main benefits of solar panels for businesses. On average, commercial solar

panels can break even in 4 or 5 years due to their high solar absorption capacities. The best solar panel companies for larger arrays include LG, Sharp, SunPower, Panasonic, and Yingli Solar.

What can solarsense do for your business?

Reduce your business costs and secure your future energy with solar PV. Working with blue-chip companies, local authorities and SMEs across all industry sectors, Solarsense specialise in commercial solar panels and provide UK businesses with a design, installation and maintenance service for solar PV.
