

# **Solar power generation time in Portugal**

## Overview

---

Solar power is a growing source in the Portuguese . At the end of 2020, solar power installed capacity totalled 1.03 GW and represented 3.6% of total power generation in 2020. Portugal has set a goal of between 8.1 GW and 9.9 GW in installed capacity by 2030.

How much solar power does Portugal generate a year?

During winter, the country's solar PV power generation dropped, recording the record low of that year in December, at only 268 gigawatt-hours. Portugal's share of electricity generation from solar photovoltaics has been in a growing trend. Get notified via email when this statistic is updated. \* For commercial use only.

How much electricity does Portugal use in 2023?

Renewable generation supplied 61% of the electricity consumption in Portugal in 2023, totalling 31.2 TWh, the highest-ever recorded value in the Portuguese national system. Wind power supplied 25% of the consumption in Portugal, hydropower contributed 23%, photovoltaics accounted for 7% and biomass for 6%.

Do you need a subscription to use solar power in Portugal?

A paid subscription is required for full access. In 2023, power generation from solar photovoltaics (PV) in Portugal was the highest throughout the summer months, peaking at 665 gigawatt-hours in July. During winter, the country's solar PV power generation dropped, recording the record low of that year in December, at only 268 gigawatt-hours.

Are renewables the future of electricity in Portugal?

In the electricity sector, renewables hold a much larger share. Portugal's renewable power capacity has been growing steadily in the last years, surpassing 18 gigawatts in 2023. This represents a share of over 86 percent of the total installed capacity in the country. This growing trend is expected to accelerate in the upcoming years.

How much solar power will Portugal have by 2030?

Portugal has set a goal of between 8.1 GW and 9.9 GW in installed capacity by 2030. The Serpa solar power plant is an 11 megawatt plant covered 150 acres (0.61 km<sup>2</sup>) and employs 52,000 PV panels. The panels are raised 2 meters off the ground thus allowing grazing to continue.

Is Portugal entering the next stage of its energy transition?

“Portugal is entering the next stage of its energy transition,” says Ember analyst Matt Ewen. “ Wind power and interconnection made it possible for Portugal to phase out coal in 2021; solar is now pushing gas off the grid.” Wind and solar produced more than half of Portugal's electricity for the first time last month. Ember
