Overview

The cost of a solar water heater can range from \$1,500 up to around \$13,000, depending on factors like the system size and type, materials used, and installation costs. The average cost before factoring in federal incentives is around \$9,000. How much does a solar water heater cost?

Solar water heaters for homes cost \$3,000 to \$9,000 with installation. Active solar water heating costs \$2,300 to \$6,000, and passive thermal water heaters cost \$1,000 to \$3,700 for the system alone. Solar hot water collector panels cost \$800 to \$1,500 each. Solar storage tank prices are \$1,000 to \$2,800. *Before applying tax credits and rebates.

How much does a solar hot water installation cost?

In addition to the monetary benefits, installing solar hot water reduces your use of greenhouse gas-producing fossil fuels, making it a good choice for the environment as well. What might a solar hot water installation cost you upfront?

On average, a complete system will cost approximately \$9,000 before rebates and incentives.

What is a solar water heating system?

Usually a solar water heating system is designed to fulfill a major part of the hot water requirements of the premise, with the rest being made up by electric heating (or gas heating). Above: A small solar water heating installation at a fire station in Hong Kong.

Does solar hot water save money?

With a solar hot water system, you can use the sun's power to save money and reduce your reliance on conventional energy sources such as oil, electricity, and gas. Solar hot water cuts down on greenhouse gas emissions in the atmosphere and also helps you save money long-term by reducing gas and electricity bills.

How much does a solar pool heater cost?

Solar pool heaters cost \$2,500 to \$6,500 with installation, depending on the size and number of collectors. A solar pool heating system uses the pool's existing pump to move water through roof-mounted collectors, where the sun's energy warms the water before returning it to the pool.

Does a solar hot water system pay for itself?

As soon as your installation is complete, your solar hot water system starts producing free heated water from the sun's energy. The result: instant returns in the form of much lower utility bills. Over its long lifetime, your solar hot water installation will eventually pay for itself and then some.

Solar power hot water system price

How Much Does a Solar Water Heater Cost? [2024 Data]

The cost to install a solar water heater--with labor and parts included--runs an average of \$3,737, though prices can go from \$1,797 to \$5,722. This is a heftier investment ...
