

Solar power puts an end to high electricity bills

Overview

Do solar panels lower your electricity bill?

Energy cost savings is often the primary reason homeowners invest in solar panels. But what exactly happens to your electric bill before and after installing solar panels?

In this article, we'll explain exactly how solar panels lower your electricity bill so you don't end up saying, "I have solar panels. Now what?"

”.

Could solar panels increase energy bills this winter?

If energy bills rise as predicted this winter, then the value of electricity generated through solar panels could almost double, says Kevin Holland, managing director of The Solar Shed, a Norfolk-based renewable energy business. He says a typical solar panel system could generate £1,200 worth of electricity in a year at current prices.

Does a grid-tied solar system reduce your electric bill?

While homeowners with grid-tied solar systems receive an electric bill before and after installing solar panels, the bill will be substantially lower – if not zero. On solar.com, we design systems for maximum bill reduction and energy cost savings every single day.

Can solar energy save you money?

Trade body Solar Energy UK claims a typical house could reduce its bills by £330 a year with panels and cover the cost of installation within nine years. Figures from comparison site Energyhelpline.com suggest you can save between £200 and £450 on your bill, while also making another £450 selling electricity back to the grid.

Do I still have an electric bill after installing solar panels?

Yes, you'll still have an electric bill before and after your solar panels are installed and producing clean energy. However, the balance due on your monthly bills will be much lower – or even negative – because your solar production replaces and offsets the cost of buying grid electricity from your utility.

Could new solar products cut electricity bills?

Two new solar products from British companies could cut bills for those who cannot put panels on their roof. Solivus's solar sculpture and Filia's solar blinds could provide households an estimated 10-30% of their electricity.
