

Solar power station feeding sheep

Overview

Do Sheep fit under solar panels?

Sheep, on the other hand, fit nicely under the panels, typically built 2-3 feet off the ground, and they keep their heads down for the business at hand. The panels provide shelter and shade. Studies are also finding that vegetation planted for grazing under solar panels helps keep the panels cool, boosting energy production.

How does a solar array help sheep eat?

Sheep feed from a mix of plants growing at the Nittany 1 solar array in central Pennsylvania. The plants were selected to support the sheep's nutritional needs and attract pollinating insects. Lightsource BP "Normally, we hired crews with lawn mowers and Weed Wackers.

Can sheep graze on solar panels?

With many solar arrays ending up on farmland, a movement is fast taking hold to make sure that they will benefit the environment, agriculture and wildlife, and not just create a sea of silicon. Allowing sheep to graze among solar panels has become one attractive antidote.

Can grazing under solar panels boost energy production?

Studies are also finding that vegetation planted for grazing under solar panels helps keep the panels cool, boosting energy production. Sheep feed from a mix of plants growing at the Nittany 1 solar array in central Pennsylvania. The plants were selected to support the sheep's nutritional needs and attract pollinating insects. Lightsource BP.

Can sheep be used in a solar park?

Although they have had to adapt their sheep system to fit into the solar park, it is an arrangement that works well, says Mrs Morgan, who explains that the sheep are used as "lawn mowers" to manage grass while producing lambs.

Fenton Home Farm, near Haverfordwest, Pembrokeshire.

Why do ewes use solar panels?

The panels have the added benefit of providing shade from the hot sun and shelter for the young lambs when weather conditions are challenging. The solar land is mostly rested for three months from November. There is other land the flock can use, and some ewes are sent away to tack grazing for those months.
