

Solar power touch screen

Overview

How does a solar phone work?

The solar layer lives below the touch layer in the phone screen, and houses transparent crystals that soak up light and a chip that converts the energy and feeds it into the phone battery. The screen isn't meant to be the phone's primary power source.

How much power does a solar phone use?

But he says the company expects to improve the technology and deliver up to 4 milliwatts by the end of 2015. Even with those improved numbers, the solar layer won't provide enough power to keep the phone going indefinitely if it is being used regularly. But today's large screen phones have more surface area.

Does Kyocera have a solar screen?

Phones, like Samsung's Blue Earth, have solar cells embedded on the back. But when using a phone, the back is obscured by your hand, and it's the screen that gets the most exposure to light. So Kyocera has incorporated transparent solar technology into the screen of its rugged Torque line.

Is SunPower integrating solar technology into a phone case?

SunPower is also working on integrating its technology into cases and smart covers for phones and tablets. The company calls this technology Wysips Graphics, because the solar portion isn't visible, and lets case makers create custom designs, just like with other phone cases and covers.

Will the world run out of touch screens?

The world might run out of a crucial ingredient of touch screens. But don't worry, we've invented an alternative The world might run out of a crucial ingredient of touch screens. But don't worry, we've invented an alternative Touch screens: why a new transparent conducting material is sorely needed.

Does Kyocera have transparent solar technology?

So Kyocera has incorporated transparent solar technology into the screen of its rugged Torque line. The tech is thin enough to be incorporated into existing phones. The solar layer is less than 0.5 millimeters thick, according to a press release, and up to 90 percent transparent, so it doesn't visibly interfere with the quality of an image.

12.8V6Ah

- Nominal voltage (V):12.8
- Nominal capacity (Ah):6
- Rated energy (Wh):76.8
- Maximum charging voltage (V):14.6
- Maximum charging current (A):6
- Floating charge voltage (V):13.6-13.8
- Maximum continuous discharge current (A):10
- Maximum peak discharge current @ 10 seconds (A):20
- Maximum load power (W):100
- Discharge cut-off voltage (V):10.8
- Charging temperature (°C):0-+50
- Discharge temperature (°C):-20-+60
- Working humidity: <95% R.H (non condensing)
- Number of cycles (25 °C, 0.5c, 100%doD): >2000
- Cell combination mode: 32700-4s1p
- Terminal specification: T2 (6.3mm)
- Protection grade: IP65
- Overall dimension (mm):90*70*107mm
- Reference weight (kg):0.7
- Certification: un38.3/msds
