Overview

Who is responsible for solar energy?

As the party in government, the Conservatives bear the most responsibility for this. The Greens aren't entirely off the hook, though. Their decisions to oppose some solar farms shape our energy system, and give the impression that local objections have more weight than national missions.

Why do some councillors oppose solar farms?

Despite the party's zeal for sources of renewable energy, some of its councillors in England have opposed solar farms locally. While these councillors say they had good reasons to reject solar farms, their resistance sits uneasily alongside their party's national energy policy, which envisions a rapid transition from fossil fuels to renewables.

Are campaigners 'shell-shocked' about a 2,500-acre solar farm?

Campaigners opposed to a 2,500-acre solar farm said they were "shell-shocked" after the plan was approved by the secretary of state for energy. Sunnica's £600m energy farm on the Cambridgeshire-Suffolk border was given the green light on Friday.

Why do Greens oppose solar farms?

The Greens aren't entirely off the hook, though. Their decisions to oppose some solar farms shape our energy system, and give the impression that local objections have more weight than national missions. Frank Adlington-Stringer is one Green councillor who has opposed a solar farm in the past.

Who opposes a solar farm in Suffolk?

Suffolk County Council, East Cambridgeshire District Council and former Conservative MPs Matt Hancock for West Suffolk and Lucy Frazer for Ely had opposed it. Where is the solar farm going?

Sunnica said its solar farm would power 172,000 homes and create 1,500 jobs during construction.

How many solar farms have been refused planning permission?

Planning permission for 23 solar farms has been refused across England, Wales and Scotland between January 2021 and July 2022, which could have produced enough renewable energy to power an estimated 147,000 homes annually, according to new analysis. Just four projects were refused planning permission during 2017, 2018, 2019 and 2020 combined.

Solar power under scrutiny

Cleaner German power sector coming under scrutiny in 2024: ...

German solar output is on track to set a new annual generation record, with cumulative generation through May already running more than 16% ahead of last year's ...
