Will SunPower 'wind down' residential solar installations?

SunPower (Nasdaq: SPWR) just sent an email to its employees saying that it will "wind down" residential solar installations and lay off 1,000 employees. SunPower is one of the largest residential solar installers in the US.

What's a good website for DIY solar?

Prowse also authored "Mobile Solar Power Made Easy," a popular DIY solar book with over 1,900 five-star reviews on Amazon. His website, Mobile-SolarPower.com, features wiring diagrams and system designs for DIY solar enthusiasts. Prowse's DIY solar forum provides a platform for sharing tips and tricks.

How much power does a 300W solar panel make a day?

A 300W solar panel will probably make about 1200Wh a day. Now see if that is enough. The portable A/C and humidifiers are going to be very demanding. Aren't they also about the same thing (refrigeration units)?

Look at their label or manufacturer's specifications. They should list Amps. Take the amps and multiply by 120.
