## Overview

---

### What is Solar Power World?

Solar Power World is the premier media outlet for the U.S. solar market, specializing in helping U.S. solar contractors — including installers, developers and EPCs in all markets — grow their businesses and do their jobs better. Since 2011, Solar Power World has been the largest solar installer, contractor and developer audience in the industry.

### Who is solar power world & why should you work with Kelly?

Solar Power World is a publisher in the solar industry since 2011. Kelly, who has been a part of the Solar Power World team since 2014, focuses on solar panel manufacturing, energy storage, and the development of Solar Power World's annual Top Solar Contractors list. You may consider working with her due to her expertise in these areas.

### Are solar panels the future of electricity?

Panels now occupy an area around half that of Wales, and this year they will provide the world with about 6% of its electricity—which is almost three times as much electrical energy as America consumed back in 1954. Yet this historic growth is only the second-most-remarkable thing about the rise of solar power.

### Is solar power over?

The most remarkable is that it is nowhere near over. Read more in our series on solar energy: To call solar power's rise exponential is not hyperbole, but a statement of fact. Installed solar capacity doubles roughly every three years, and so grows ten-fold each decade. Such sustained growth is seldom seen in anything that matters.

### Who is Kelsey at Solar Power World?

Kelsey is a journalist at Solar Power World who has been with the company for

almost seven years. She covers solar policy, inverters and smart homes for SPW. Kelsey is the host of the Contractor's Corner podcast and publishes a monthly update on important solar policy news. Kelsey graduated from Kent State University with a degree in magazine journalism and lives in Cleveland, Ohio.

Are solar panels free?

Sunlight is free, but solar systems still cost money. Thankfully, though, the price of going solar has plummeted over the. Solar battery technology is one of the core pieces of the electrification and solar power revolution that's happening right now. It's been well documented that the Paris Olympics will be the greenest ever.
