Tried my hand at some minimalist flags for each of the Solar System's planets. I decided to make a flag for the Pluto-Charon binary system to appease the Pluto lovers out there as well as a ...

solar system

At the center of the solar system is a star called the Sun is the largest object in the solar system. Its diameter, or distance through its center, is 865,000 miles (1,392,000 kilometers). In addition, the Sun contains more than 99 percent of all the material in the

Flags of the Solar System, c. 2312 : r/vexillology

The flags above are part of the lore of the sci-fi universe I'm creating. The year is 2312, and the Solar System is on the verge of war. For centuries, the Solar System has been dominated by Mars, and Luna (the Moon), ever since the Colonial War, where the

r/vexillology on Reddit: Flags of the Solar System

Planet Nine is a hypothetical planet in the outer region of the Solar System. Its gravitational effects could explain the unusual clustering of orbits for a group of extreme trans-Neptunian objects (eTNOs), bodies beyond Neptune that orbit the Sun at distances averaging more than 250 times that of the Earth.

[Solar Flag Pole Lighting Kits](#)
