

Solar system project shoe box

Overview

Can a shoebox Solar System be made to scale?

Although shoebox solar system models cannot generally be made to scale, they are a fun and effective way to learn the position of planets and the proportional size difference between planets, and especially between the planets and the sun. Paint the whole inside of the shoebox black.

Can you make a shoebox diorama?

Making shoebox dioramas is one of the more fun things to do as an elementary and middle school student. Although shoebox solar system models cannot generally be made to scale, they are a fun and effective way to learn the position of planets and the proportional size difference between planets, and especially between the planets and the sun.

How do you make a model Sun in a shoebox?

Cut a Styrofoam ball in half. The largest ball should be used, because this ball is going to represent the sun. Paint the sun yellow. Only the curved part of the ball needs to be painted. Glue the flat side of the model sun onto one of the sides of the shoebox. This will give the effect of the sun protruding out from space.

How do you make a solar system model?

Position the planets around the sun in the correct order. Find a cardboard box. The planets in your solar system model will hang down inside this box. You'll need to fit nine planets plus the sun into this, so make sure you have enough room. This should be at least as large as a men's shoebox, which is roughly 15" x 10" x 5½" (36 x 25 x 13 cm).

How do you represent a planet in a shoebox?

Use household items to represent each planet as well as the sun. While there are no shoeboxes large enough to demonstrate each planet's distance from

the sun to scale, it is possible to approximate the size of the planets in proportion to one another inside a shoebox.

How do you make a free Solar System project?

Get your free printable solar system project! STEP 1: Print out the planet order coloring sheet and draw with markers. Then, cut out with scissors. STEP 2: Color the sun template and cut out. STEP 3: Paint the inside of a shoe box with black acrylic paint and let dry. STEP 4: Tape the sun to the left side of the box.
