

Solid power competitors

Overview

The main competitors of Solid Power include Eos Energy Enterprises (EOSE), Ballard Power Systems (BLDP), GrafTech International (EAF), Byrna Technologies (BYRN), NOVONIX (NVX), 374Water (SCWO), Gauzy (GAUZ), SES AI (SES), Amprius Technologies (AMPX), and Ultralife (ULBI). Is solid power a good battery manufacturer?

Solid Power is a promising solid state electric vehicle battery manufacturer. The company's technology is expanding rapidly and catching up to competitors. Close ties with established car makers will prove crucial in future success. Risks are lowered due to a variety of macro tailwinds and the nature of the battery industry.

Is solid power (SLDP) a solid-state battery company?

Currently, Solid Power (NASDAQ: SLDP) is developing highly scalable solid-state batteries at the cutting edge of the industry. In the past, my coverage has been focused on one of Solid Power's most significant competitors: QuantumScape (QS).

Is solid power going public?

Solid Power, a promising solid-state battery start-up backed by Ford Motor (F 3.88%) and BMW (BMWYY 0.28%) (BAMXF 0.11%), said that it has agreed to go public via a merger with special purpose acquisition company (SPAC) Decarbonization Plus Acquisition III (DCRC). The deal values the combined company at about \$1.2 billion.

Is solid power a good buy?

Even though there are risks involved at today's prices and climate, Solid Power is a good buy for the continuing mass commercialization of electric vehicles. The recent sell-off of technology stocks has left Solid Power far below where they were estimated via SPAC.

Is solid power closer to mass production than its rivals?

That may soon change. First and foremost, Solid Power appears to be closer to mass production than its rivals. Most solid-state battery efforts are at least a few years away from production. QuantumScape, for example, is hoping to begin pilot production of its batteries in about three years.

Should you buy solid power (QS) at today's prices?

In the past, my coverage has been focused on one of Solid Power's most significant competitors: QuantumScape (QS). However, I believe that Solid Power at today's prices offers investors the best opportunity to get in on the early stages of a battery powerhouse.
