### [Power Flushing questions and answers](#)

Mains Flushing: Uses the mains water supply to flush out the system but is can cause leaks and burst radiators of older and open vented systems that are not use to the pressure. Older systems, especially those with plastic or copper microbore pipes, often need more aggressive cleaning, as these methods might not fully clear hardened sludge or blockages.

### Powerflush model#S1101

Powerflush model#S1101 Author: jazzbilly (TN)  
Just a quick question, I have a basement and we were contemplating putting in a half bath, or a bath with a shower. So anyway we was at Lowes (love Lowes) and they gave me a brochure on the Powerflush model# S1101, it looks like a really great idea, but being that they want to sell it they really wouldn't say anything about what can ...
