

State Grid Fudan Micro

Overview

Who is Shanghai Fudan microelectronics group?

Search. Shanghai Fudan Microelectronics Group Co., Ltd. (hereinafter FMSH) is one of the leading companies specialized in the design and development of ASIC and the provision of total solutions in China.

What did state grid Aksu power supply company say about microgrid construction?

State Grid Aksu Power Supply Company said that the review seminar clarified the direction and path of microgrid construction, and reached a consensus on the importance, load characteristics and construction significance of microgrid demonstration projects in Kuqa area.

Who is Fudan microelectronics group special fund?

The Shanghai Charity Foundation Fudan Microelectronics Group Special Fund was established to fulfill corporate social responsibility and pass on good character from the inside out. The FM1280 financial IC card chip has accumulated sales of over 100 million, and there are more than 50 batch issuing banks in the pure financial field.

Will Microgrid technology bring good news to the power supply?

In the future, with the continuous maturity of microgrid technology and the expansion of its application scope, it is believed that it will bring good news to the power supply of more remote areas. SOURCE State grid Aksu power supply company.

What will Fudan micro do?

The funds raised by the listing and issuance of Fudan Micro will be used for the R & D and industrialization projects of programmable system on chip, development and science and technology reserve funds. We will have Broader technological possibilities. The total shipments of FM1280 financial IC card

chip exceeded 100 million, a new sales record.

Are distributed energy resources-based micro-grids effective?

The amalgamation of distributed energy resources-based microgrids to the conventional power system is giving rise to a new power framework. Nevertheless, the grids' control, protection, operational stability, and reliability are major concerns. There has yet to be an effective real-time implementation and commercialization of micro-grids.
