

Steps to making your own solar panels

Overview

How do you build a solar panel?

To build your own solar panel, you'll need to assemble the pieces, connect the cells, build a panel box, wire the panels, seal the box, and then finally mount your completed solar panel. Purchase the cells. There are a few different types of solar cells to buy, and most good options are either made in the United States, China, or Japan.

How do I build a solar system?

First, buy premade solar panels -- it'll be pricier to assemble ones from scratch yourself -- then fit them into racks (you can build your own) and angle them toward the sun. This kind of system can power direct current, or DC, devices.

Can you build your own solar panels?

Yes — it is possible to build your own solar panels from scratch. It may be challenging to replicate the caliber of a solar manufacturer that has years of research and experience behind it, but it can still be done. [Is It Cheaper to Build Your Own Solar Panels?](#)

.
