

Successful bid price of LFP battery system project in Croatia 2025

Overview

Where does LFP spot price come from?

LFP spot price comes from the ICC Battery price database, where spot price is based on reported quotes from companies, battery cell prices could be even lower if batteries are purchased in high volume. Estimated cell manufacturing cost uses the BNEF BattMan Cost Model, adjusting LFP cathode prices with ICC cathode spot prices.

Are LFP batteries better than NMC batteries?

The report states that LFP batteries reached 80% of the batteries sold in China during November and December. “The higher energy density of NMC batteries remains an advantage for applications requiring longer ranges or operation in cold climates,” the report notes.

Why did European battery market share decline 80% in 2022?

Korean companies, the largest battery producers in Europe, saw their EU market share decline from nearly 80% in 2022 to 60% in 2024, primarily due to Chinese competition and the rising popularity of LFP batteries.
