

Successful bid price of commercial energy storage project in China 2025

Overview

In Q1 2025, the entry-level bid prices for lithium battery industrial and commercial energy storage systems ranged from 0.4493 to 1.0487 yuan/Wh, with an average price of 0.6756 yuan/Wh and a weighted average successful bid price of 0.6659 yuan/Wh.

In Q1 2025, the entry-level bid prices for lithium battery industrial and commercial energy storage systems ranged from 0.4493 to 1.0487 yuan/Wh, with an average price of 0.6756 yuan/Wh and a weighted average successful bid price of 0.6659 yuan/Wh.

China Energy Engineering Corporation (CEEC), a state-owned infrastructure giant, has launched one of China's largest energy storage procurements to date, tendering 25 GWh of lithium iron phosphate (LFP) battery systems on 3 June. The bid is being viewed as a watershed moment for the marketization.

June 25, 2025 | Beijing, China — China Energy Engineering Group Co., Ltd. (CEEC), one of the country's leading state-owned energy conglomerates, has officially opened the bidding for its 2025 centralized procurement of lithium iron phosphate (LFP) energy storage systems. With a total scale of.

On March 19, Keda Guokong successfully won the bid for the China Telecom (Anhui) Intelligent Computing Center's energy storage project (Phase 1). This project is located in the Nankang District of Hefei City, Anhui Province, equipped with a 25 MW/200 MWh lithium iron phosphate battery storage.

This Beijing-based firm bagged a ¥900 million deal for 150MW/15MWh flywheel systems in Shanxi – basically creating giant mechanical batteries that spin faster than a TikTok dance trend [3]. State Power Investment Corp's 2.4GWh Battery Bonanza: With requirements for 314Ah lithium iron phosphate.

On June 3, 2025, China Energy Engineering Corporation (CEEC), a leading state-owned infrastructure company, initiated a significant procurement process for 25 GWh of lithium iron phosphate (LFP) battery systems. This tender represents one of China's largest energy storage initiatives, marking a.

The procurement exercise has attracted 67 battery energy storage companies but only six have emerged as winners. The average bid stood at CNY 0.473/Wh (\$65/kWh). Public procurements in China continue to demonstrate exceptionally low price levels for lithium-ion phosphate (LFP) battery energy. How much does energy storage cost in China?

In December, PowerChina's 2025-2026 energy storage system procurement, which sought 16 GWh of BESS, saw bids ranging from \$60.5/kWh to \$82/kWh, averaging \$66.3/kWh. In January, CGN New Energy procured 4.5 GWh of grid-forming BESS and 6 GWh of grid-following BESS.

What does China Energy Engineering Corporation's landmark procurement mean for energy storage?

China Energy Engineering Corporation's landmark procurement signals a shift toward market-driven energy storage, with bids reflecting aggressive cost-cutting and rising industry consolidation.

What is China's lowest battery bid?

The lowest bid of CNY 0.37/Wh (\$0.051) represents a 30% drop from 2024 levels, setting a new industry record. The bid attracted China's largest battery players including CATL, BYD, Sungrow and Envision Energy.

How much does a Chinese company bid?

The average bid of the first six candidates was 0.4730 yuan/Wh, while the bids of the three alternative companies were somewhat higher and stood at 0.4738 yuan/Wh, 0.486 yuan/Wh and 0.4784 yuan/Wh. The latest results follow in the footsteps of recent procurements which saw similarly low prices.
