

Successful bid price of container energy storage project in Spain 2030

Overview

How many new energy storage projects are in Spain?

Spain targets 20GW of new energy storage by 2030. The first tender ended up being oversubscribed with more than 1.1GW/1.1GWh capacity, between 58 projects, not selected for the funding of the tender. The projects that were awarded in the PERTE tender were measured based on four criteria, with different points.

Is Spain targeting 20GW of energy storage by 2030?

Spain is targeting 20GW of energy storage by 2030. This BESS was deployed by Ingeteam at a green hydrogen facility in Ciudad Real. Image: Ingeteam. The government of Spain, through the Institution for the diversification and energy savings (IDAE) has awarded 880MW/1,809MWh in its first tender for energy storage to be co-located with renewables.

Does Spain support energy storage?

Spain already backs energy storage with more than €600 million of NextGenEU funding which was allocated as part of Spain's, post-Covid Recovery, Transformation, and Resilience Plan. From pv magazine España.

How can we reduce energy prices in Spain?

Thus, avoiding the loss of energy that we stop using when capacity exceeds demand. Energy that we could use, for example, at times when the sun is not shining or the wind is not blowing, thus also reducing its price. Figure: Evolution of renewable projections in Spain.
