

Successful bid price of portable ESS system project in Greece 2030

Overview

The bids were priced at between EUR 34,000 (USD 37,475) per MW and EUR 64,000 per MW and were capped at EUR 115,000 per MW per year. The lowest offer was launched by Helleniq Energy, while Intra Energy placed the highest bid.

The bids were priced at between EUR 34,000 (USD 37,475) per MW and EUR 64,000 per MW and were capped at EUR 115,000 per MW per year. The lowest offer was launched by Helleniq Energy, while Intra Energy placed the highest bid.

The average subsidy price in the third auction exercise came at €52589.16/MW/year. The lowest successful bid stood at €43927/MW/year, concerning a 25 MW/100 MWh project in the Western Macedonia region. The highest awarded subsidy came at €58773/MW/year and refers to a 7.9 MW/31.6 MWh project.

Greece has launched its third and final tender under a 1-GW program to support standalone battery energy storage systems (BESS), aiming to allocate 200 MW of capacity with available subsidies of EUR 200,000 (USD 217,920) per MWh. This move, approved by Greece's Regulatory Authority for Energy.

The bids were priced at between EUR 34,000 (USD 37,475) per MW and EUR 64,000 per MW and were capped at EUR 115,000 per MW per year. The lowest offer was launched by Helleniq Energy, while Intra Energy placed the highest bid. The selected developers will receive a grant of up to EUR 200,000 per MW.

Helleniq Energy and Intra Energy (Intrakat) are each behind three of these 12 projects, PPC Renewables bid successfully for two projects, while Aenaos (Mytilineos), Energiaki Techniki Anaptyxiaki, Energy Bank, and one energy community bid successfully for one energy storage project each. According.

The Greek NECP has set very ambitious targets for Energy storage with 5.6 GW up to 2030, capacity much needed to integrate the very large amounts of variable RES and enhance System Flexibility. Despite its proven value to social

welfare, Energy Markets still cannot monetize the value of Energy.

While 12 projects won awards in the first tranche of Greece's recent grid-scale energy storage auctions, what of the c.500 totalling nearly 27GW that didn't?

Jon Ferris, LCP Delta's Head of Flexibility and Storage, looks at the dynamics which could play out in rounds two and three in Europe's. What is the storage capacity requirement for ESS projects?

Exceptionally, in the context of the third auction and for ESS projects with a maximum total capacity of 50 MW, this storage capacity requirement is limited to 250 MWh, provided that the storage technology used is new and durable.

Can ESS project operators participate in an auction?

In order to be eligible to participate in an auction, ESS project operators should not have begun their construction prior to the submission of their offers, while for participants in the first auction, it is also stipulated that they must be endowed with a valid energy storage license.

How long does it take to bid for a waste & energy auction?

Each auction shall be conducted by the Regulatory Authority for Waste, Energy and Water (" RAWEW ") - known until recently as Regulatory Authority for Energy (RAE) - and the tenderers' offers shall be submitted between 21 and 28 days from the date of RAWEW's invitation. The procedure to be followed is that of a single-stage bidding. 4.

How much does a Bess system cost?

With BESS system prices being high today (with costs for Lithium-Ion BESS ranging from 550.000 EUR/MW to 650.000 EUR/MW for the future. The augmentation or repower plan strategy to be followed by the investor will greatly influence the commercial assessment both in terms of costs and revenues.

How many MW can you bid for a project?

Further restrictions complicated the bidding process, including a maximum capacity of 100MW per project and 300MW per region, and no participant allowed to win more than 25% of any auction. These restrictions meant that Eunice and Piritium both bid 50MW for projects licensed at 250MW/1000MWh

and 150MW/450MWh respectively.

Successful bid price of portable ESS system project in Greece 2030

Greece presents 3.5 GW standalone battery storage ...

The government now aims for 2.65 GW of battery projects on the transmission grid and a further 900 MW on the distribution grid. According to the Greek National Energy and Climate Plan (NECP), the nation aims to install ...

Greek energy storage support scheme - commencement of ...

The amount of the operating aid shall be calculated separately for each ESS project according to a formula to be adopted by decision of the RAWEW, taking into ...
