

Successful bid price of solar plus storage project in Vietnam 2025

Overview

According to the Ministry of Industry and Trade, the pricing for solar power with integrated battery storage in 2025 may reach up to 1,875 VND/kWh, higher than traditional solar power.

According to the Ministry of Industry and Trade, the pricing for solar power with integrated battery storage in 2025 may reach up to 1,875 VND/kWh, higher than traditional solar power.

For projects without battery storage, the tariff will be VND 1,382.7 (\$0.053)/kWh for the northern part of the country, VND 1,107.1/kWh for the central part, and VND 1,012.0/kWh for the southern region. For solar power plants relying on battery storage systems, the FiTs for the three regions will.

On April 10, 2025, the Ministry of Industry and Trade (MOIT) issued Decision 988/QĐ-BCT (“Decision”), updating Vietnam’s feed-in tariff (FiT) rates for solar power projects. These tariffs, effective under the framework of Circular 09/2025/TT-BCT issued on February 1, 2025 (“Circular”), will apply.

HÀ NỘI — The Ministry of Industry and Trade (MOIT) has officially issued the 2025 electricity generation price ceiling framework for various types of power plants, including hydropower, gas turbines using natural gas and solar power. The decisions came into effect on April 10, 2025, in line with.

Vietnam is taking another step toward modernizing its renewable energy sector by unveiling updated feed-in tariffs (FiTs) for solar power, with a notable emphasis on encouraging battery energy storage systems (BESS). This policy move, effective throughout 2025, was formalized through Decision.

The electricity price framework for hydropower plants in 2025 is from 0 to 1,110 VND/kWh (excluding water resource tax, forest environmental service fees, water resource exploitation rights fees, and value-added tax). The maximum price is 1,110 VND/kWh. 2. Electricity Price Framework for Gas.

Vietnam’s Ministry of Industry and Trade (MOIT) has announced a new round

of feed-in tariffs (FIT) for solar power, introducing location-based pricing and, for the first time, incorporating energy storage systems. The updated scheme highlights the growing importance of storage in stabilizing the. How much does a solar plant cost in Vietnam?

Vietnam's Ministry of Industry and Trade (MoIT) has published the new feed-in tariffs for utility-scale solar plants. For projects without battery storage, the tariff will be VND 1,382.7 (\$0.053)/kWh for the northern part of the country, VND 1,107.1/kWh for the central part, and VND 1,012.0/kWh for the southern region.

What does Vietnam's Solar Policy update mean for energy storage?

Vietnam's solar policy update highlights growing role of energy storage. (Photo: iStock) Vietnam's Ministry of Industry and Trade (MOIT) has announced a new round of feed-in tariffs (FIT) for solar power, introducing location-based pricing and, for the first time, incorporating energy storage systems.

Does Vietnam have new feed-in tariffs for solar power?

April 2025 | Southeast Asia Impact Alliance Vietnam is taking another step toward modernizing its renewable energy sector by unveiling updated feed-in tariffs (FiTs) for solar power, with a notable emphasis on encouraging battery energy storage systems (BESS).

What are the conditions for solar storage in Vietnam?

Conditions for systems with storage include a minimum storage capacity of 10% of the solar plant's installed capacity, a charge/discharge time of 2 hours, and at least 5% of total generation used for charging the storage system. Overall, projects with storage receive higher FIT rates. Previously, Vietnam's FiTs were relatively low.

What are the new fits for solar power projects?

These updated FiTs aim to enhance grid reliability while aligning with the nation's broader energy transition strategy. The most significant development in this update is the introduction of differentiated tariffs for solar power projects that incorporate battery storage.

How much solar power does Vietnam have?

According to the latest statistics from the International Renewable Energy Agency (IRENA), Vietnam had approximately 18.66 GW of installed PV capacity at the end of 2024. Last year's new additions totaled around 79 MW. This content is protected by copyright and may not be reused.
