

Sunny boy sma sb7000us solar inverter

Overview

What is a Sunny Boy Solar System?

The Sunny Boy 3.0-US/3.8-US/5.0-US/6.0-US/7.0-US/7.7-US join the SMA lineup of field-proven solar technology backed by the world's #1 service team. This improved residential solution features ShadeFix, SMA's proprietary technology that optimizes system performance.

What is a Sunny Boy inverter?

The Sunny Boy is a DC to AC grid-tied utility interactive inverter for use with photovoltaic (PV), fuel cell, wind turbine and other sources of DC power. In general, the Sunny Boy takes power from a DC source (PV modules) and converts it to AC power for the utility grid.

How do you connect a Sunny Boy inverter?

Use a screwdriver in order to poke a hole in the groove of the grommet inside the inverter. Remove the membrane. Pull the cable into the Sunny Boy. Pull the cable slightly back in order to seal the grommet. Connect the white wire of the SMA DC-Disconnect to the terminal labeled N and the black wire to the terminal labeled L1 of the Sunny Boy.

How much power does a Sunny Boy 8000us use?

If there is adequate solar irradiation and the resulting PV input voltage is greater than 300 V DC (365 V DC for Sunny Boy 8000US), the Sunny Boy will automatically begin feeding power to the utility grid. The Sunny Boy operates from the power produced by the PV array and is designed for minimal internal DC-power consumption.

How do I connect Sunny Boy 8000us to a 208 volt grid?

For 208/240/277 V connect the L1 (AC line 1 or UNGROUNDED) wire to the terminal labeled L1 in the SMA DC-Disconnect. The Sunny Boy 8000US may not be connected to a 208 V grid. For 208/240 V connect the L2 (AC line 2)

and N (AC line N) wire to the terminal labeled L2 and N in the SMA DC-Disconnect.

Can a Sunny Boy inverter be installed on a wall?

This vibration is normal and has no effect on performance, but it can be objectionable if the inverter is mounted on a wall in a living area, on the outside of a wall that is near a living area, or on certain types of materials, such as thin wood panelling or sheet metal. Do not install the Sunny Boy in direct sunlight.
