

Sunwork renewable energy projects

Sunwork renewable energy projects

About SunWork

Since its founding in 2005, SunWork has trained more than 3,000 volunteers, installed over 1300 solar PV systems (almost 7 MW), and replaced more than 150 gas-burning water heaters with heat pump water heaters at homes, preschools, shelters, meal centers, places of worship, and nonprofit organization headquarters around the state. Why SunWork.

[Affordable Solar For Your Home](#)

SunWork's mission is to make renewable solar energy more affordable for low-energy-footprint homeowners. Often those who are already saving on their electricity bills haven't been able to justify the costs of going solar.

[SunWork Renewable Energy Projects](#)

By reducing the cost of systems for low-energy-footprint homes and for nonprofits, SunWork puts solar power within more people's reach. Working with us gives environmentally-concerned volunteers a way to do something to make a difference in the fight against climate change.

[SunWork Renewable Energy Projects](#)

SunWork is a nonprofit in San Francisco Bay Area and California Central Coast that installs solar electricity systems on small-energy-footprint homes with the help of trained volunteers.

SunWork Renewable Energy Projects , Milpitas, CA , Cause IQ

SunWork Renewable Energy Projects carries out volunteer-assisted solar photovoltaic system installations to reduce the cost and make them feasible for more customers. They have installed 120 reduced-cost residential retrofit grid-tied solar photovoltaic systems for low-energy-use homeowners, as well as 5 nonresidential systems.
