Overview

The company was founded as SGF Energy in 2015 by Peter Carlsson [] (now CEO) and Paolo Cerruti (now CEO Northvolt North America) who were working in Supply Chain and Operations Planning at prior to that. In 2017, the company changed its name to Northvolt. It was founded with the aim to supply the with . In May 2019, the off.

Can Sweden make a battery?

Both factories Northvolt Ett (set to be the largest battery-making factory in the world once fully operational in 2022) and Northvolt Labs, which collaboratively aim to have 150GWh of annual production by the end of the decade, use Sweden's large amount of renewable hydroelectric power to produce cells as sustainably as possible.

Is Northvolt the first European company to make a battery?

REUTERS/Helena Soderpalm/File Photo Purchase Licensing Rights
STOCKHOLM, Dec 29 (Reuters) - Sweden's Northvolt said on Wednesday its new gigafactory in northern Sweden has assembled its first battery cell, making it the first European company to design and manufacture a battery on the continent.

Where is Sweden's first homegrown battery factory located?

Deep in a dense, sub-Arctic pine forest in northern Sweden, a flat grey structure blends into both the snow and the overcast horizon. This improbable location is the birthplace of one of the most important industrial projects in Europe: its first homegrown battery factory.

Is Northvolt building a new lithium-ion battery factory near Gothenburg?

In the vicinity of the Volvo plant near Gothenburg, Northvolt is building a new lithium-ion battery factory that will supply not only Volvo but also the Polestar brand. Production is scheduled to start in 2025. Northvolt Fem (Swedish: five) is the second gigafactory planned by Northvolt in Sweden.

Where are Northvolt batteries made?

Our first battery gigafactory is being established in northern Sweden and serves as Northvolt's primary site for manufacturing of active material, cell assembly and recycling. Our research & development facility is located 100 kilometers west of Stockholm.

Could Northvolt build a battery plant in Germany?

Northvolt battery plant in Skelleftea, a small city in northern Sweden. That produced a subsidy battle between Europe and the U.S. Berlin offered Northvolt a subsidy package worth about \$1 billion to build a plant in Germany. Northvolt agreed, but Carlsson says it's still interested in a U.S. plant.

Sweden battery company

Swedish EV battery maker raises \$1.2B to expand to ...

Northvolt, a Swedish producer of lithium-ion batteries, has raised around \$1.2 billion from BlackRock and various Canadian pension plans to build new factories in North America and Europe

Sweden's battery industry grows: Kedali sets up

The company will supply square shell casings for Northvolt's batteries from an on-site production facility at the gigafactory in Sweden, which is expected to come online 2023 with an annual capacity of 40 GWh.

Northvolt in talks to secure \$5bn to become Europe's ...

Swedish start-up Northvolt is in talks to secure more than \$5bn of financing to pursue its goal of becoming Europe's biggest battery manufacturer. The company is negotiating with a number of

Northvolt becomes first in Europe to produce battery ...

Northvolt became the first European start-up to design and produce a battery at a gigafactory on the continent as the Swedish group's sub-Arctic plant fired up just days before its new year

Manufacturing

Our research & development facility is located 100 kilometers west of Stockholm. Northvolt Labs is comprised of multiple components which operate in concert to provide a fundamental platform ...

[The Northvolt battery factory](#)

There can never be too many batteries. Especially if the goal is to make Sweden's energy system 100% renewable. So we decided to invest in the Northvolt battery factory now being built in Skellefteå. På svenska. So...done deal, right? Sort of. It's going to take a

Swedish battery maker Northvolt mulls job cuts as it seeks to ...

The gigafactory, Northvolt's first, has not yet reached full production since it opened in 2021. It has around 3,500 staff, according to the company's 2023 annual report. In total the company has

LIQUID COOLING ENERGY STORAGE SYSTEM

EMS real-time monitoring
No container design
flexible site layout

Cycle Life
≥8000

Nominal Energy
200kwh

IP Grade
IP55

Manufacturing

At Northvolt, we're developing a sustainable manufacturing base for an industrial revolution that defines humanity's greatest challenge - eliminating its dependence on fossil fuels. Our research & development facility is located 100 kilometers west of Stockholm.

Sweden's Enerpoly Opens World's First Zinc-Ion Battery ...

STOCKHOLM, SWEDEN. 2ND SEPTEMBER 2024 - Enerpoly, the Stockholm-based zinc-ion battery cell technology innovator, has opened the world's first zinc-ion battery megafactory, in a landmark step towards a global transition to clean energy, supported by sustainable, affordable, and safe energy storage.

Can save energy

the battery capacity can be increased freely and flexibly according to the situation of home use.
Rechargeable lithium batteries use safe LiFePO4

- easy to install and use
- World wide products
- faster charging and discharging
- Multiple protection with alarm systems

Europe's first homegrown gigafactory , Northvolt

find Northvolt Ett - a lithium-ion battery gigafactory that stands as Europe's first homegrown response to opportunities and needs of an electric world. Power Consumption MW All renewable. Equal to 1.5% of Sweden's total energy production. + 9% of x

Northvolt in new sodium-ion battery breakthrough

The Swedish group, backed by Volkswagen, BlackRock and Goldman Sachs, has developed a sodium-ion battery that has no lithium, cobalt or nickel -- critical metals that manufacturers have scrambled

Our Lifepo4 batteries can be connected in parallels and in series for larger capacity and voltage.

[The Swedish battery industry overview](#)

Sweden's thriving battery sector offers businesses and investors a strategic and lucrative opportunity for growth. With a resilient economy, world-leading innovation, and a highly skilled workforce, the country is well-positioned for industry leadership.

Northvolt's Battery Making Boom Fizzles Out in Northern Sweden

This week, the Northvolt unit managing the expansion of its main battery-cell factory in northern Sweden filed for bankruptcy, saddling suppliers with about 606 million Swedish kronor (\$58.3

Business Sweden shines a spotlight on the Nordic battery boom

Can the Nordics become Europe's epicentre for green batteries? A new episode of Business Sweden News goes live today and takes viewers behind the scenes of an industry on the rise - interviewing three key players on the Nordic battery scene.

Volvo Car Group and Northvolt to join forces , Northvolt

21 June, 2021 , Stockholm, Sweden - Volvo Car Group intends to establish a joint venture with leading Swedish battery company Northvolt to develop and produce more sustainable batteries, tailored to power the next generation of pure electric Volvo and Polestar

Battery maker Northvolt to shift R& D from California to Sweden

STOCKHOLM (Reuters) -Battery maker Northvolt will shut down and shift development of lithium-metal battery technology from California to its R& D hub in Vasteras, Sweden, the company said

on Tuesday.

Northvolt's Swedish battery plant-expansion company files for

Northvolt Ett Expansion AB, the company responsible only for expanding the Northvolt Ett battery cell factory in Skellefteå, Sweden, has filed for bankruptcy. All work on the expansion project has already been suspended.

Warranty
10 years

- LiFePO₄
- Intelligent BMS
- Wide Temp: -20°C to 55°C

Swedish green batteries to make Europe independent

Northvolt, a Swedish company Carlsson started, is taking a crucial step into that future by building one of the world's most advanced battery factories. "Renewable energy storage is the key to a carbon-neutral society, and batteries are the key to getting there," says Carlsson, a former executive at Tesla, the US electric car company.

Northvolt: the Swedish start-up charging Europe's ...

The company is hoping to make deliveries of "several" gigawatt hours this year -- each GWh is equivalent to enough batteries to power about 17,000 electric cars.

[Europe's largest green battery factory](#)

Demand for batteries in electrical vehicles is surging, which leads to growing interests from foreign companies to explore Swedish lithium deposits. Further south from the Northvolt project in Skellefteå is the municipality of Bergby, where Canada's Leading Edge Materials Corp has an ongoing lithium project.

Even without sun and wind, get a charge from Swedish battery companies

When it's windy or sunny, wind and solar farms produce renewable energy. But the wind doesn't always blow, and the sun doesn't always shine exactly when we want to use electricity. That's why battery technology is so important to a green future. Nilar and Northvolt, two Swedish companies, are producing batteries that store green energy for use when--and ...

About

Our mission is to build the world's greenest battery, with minimal carbon footprint and the highest ambitions for recycling. Our vision is to accelerate the transition to a decarbonized future, by supplying sustainable, high-quality battery cells and ...

Meet the company: Sustainable Swedish battery firm Northvolt

Marking a new chapter in European industrial history, Swedish battery maker Northvolt delivers first lithium-ion cell at the world's largest gigafactory. Northolt is a firm of many firsts.

Altris

Altris, the Swedish sodium-ion battery developer, has secured SEK 50M of bridge financing from its current owners and appointed Björn Mårlid as its new CEO and Christer Bergquist as new CFO, as the company moves ahead with its ...

NOVO Energy

We're building a first-of-its-kind R& D center and Li-ion battery Gigafactory in Gothenburg, Sweden, equipped with the expertise and technology to craft state-of-the-art batteries. Aiming for optimal integration with our automotive partners, our vision is to accelerate the electrification of transportation, while limiting environmental impact.

Northvolt, a Swedish battery company, has received more than ...

[Swedish battery company Northvolt has won more than US \$27 billion orders to expand its annual battery recycling capacity to 125000 tons.] Swedish battery company Northvolt announced that it will expand the capacity of its Revolt Ett recycling plant in Sweden to have the capacity to recycle 125000 tons of batteries per year, and plans to start construction ...

Enerpoly , Charge the World, Innovate the Future

We produce proprietary zinc-ion battery cells and packs for scalable stationary energy storage solutions, leveraging a safe, reliable, and cost-effective technology. Enerpoly, a leading innovator in the energy storage sector, is advancing the commercialization of its

Research

The goal is to develop ultra-high performance batteries and novel supporting battery production processes to consolidate the strong Swedish battery research community. The research is carried out through collaborations between academia and companies, and comprises of three themematic areas, which are then embedded in five cross-cutting activities.
