

Tesvolt ag

Overview

Who makes tesvolt battery storage systems?

TESVOLT produces battery storage systems for commerce and industry. Founded by Daniel Hannemann and Simon Schandert in 2014, TESVOLT has conquered the market for renewable energy storage solutions. In 2022, finance expert Philipp Koecke joined the Board of Directors.

Who is tesvolt & how will it work?

The park will be operated jointly by the local energy supplier EWR AG, the PV and storage project developer W POWER, and the construction project developer TIMBRA. TESVOLT is supporting the project development, supplying and installing the large-scale storage system, and will take over service and maintenance for the storage power plant.

What is tesvolt energy storage system?

State-of-the-art prismatic lithium battery cells from Samsung SDI combined with our patented and TÜV-certified Active Battery Optimizer smart cell control system form the core of our storage systems. TESVOLT energy storage systems are the economical choice for the most demanding applications.

How does tesvolt storage work?

TESVOLT storage systems function just as well at low voltage as at high voltage, and can be connected to all energy producers: sun, wind, water, biogas and combined heat and power — on-grid and off-grid. Our commercial storage solutions are manufactured in the first Gigafactory for battery storage systems in Europe at the Wittenberg location.

Is tesvolt a good company?

TESVOLT has received numerous awards, including the German Entrepreneur Award, and was twice named most innovative company by the TOP 100 jury. TESVOLT manufactures its products in its Wittenberg plant, Europe's first

carbon-neutral gigafactory for stationary battery storage systems, and delivers them worldwide.

How does tesvolt get its energy?

TESVOLT obtains its heating energy in the new production facility from air heat pumps and heat recovery. Surplus electricity is collected in TESVOLT's own battery storage systems. The German Gigafactory complies with the KfW55 standard and is being built by Goldbeck as the general contractor.

- Efficient Higher Revenue**
 - Max. Efficiency 97.5%
 - Max. PV Input Voltage 600V
 - 100% Peak Output Power
 - 240V Modules, 150% DC Input Overvoltage
 - Max. PV Input Current 55A, Compatible with High-Power Modules
- Intelligent Simple O&M**
 - IP65 Protection Degree: support outdoor installation
 - Smart ITC Error Diagnostic Function: locate PV string faults accurately and automatically detect faults
 - DC & AC Type II SPD: prevent lightning damage
 - Battery Reverse Connection Protection
- Flexible Abundant Configuration**
 - Plug & Play, EPC Switching Under 10min
 - Compatible with Lead-acid and Lithium Batteries
 - Max. 6 Units Inverters Parallel
 - MFC Function (Optional): when an arc fault is detected the inverter immediately stops operation

12.8V 100Ah

Über uns

Die TESVOLT AG, einer der Technologieführer für Energiespeicherung im gewerblichen und industriellen Umfeld, erwirbt im November 2022 eine wesentliche Beteiligung an der Wendeware AG. Die Beteiligung erfolgt im Rahmen von TESVOLTs Wachstumsstrategie und wird wichtige technologische Fortschritte im Bereich der Energiespeicherlösungen und die
