

# **The neighbor in front installed solar photovoltaic panels**

## Overview

---

If you're considering installing solar panels on your property, it's important to be aware of the rules and regulations surrounding their installation. In the UK, solar panel installations are generally considered to be 'permitted developments,' meaning that they don't usually require planning permission from the local authority.

There are certain parameters that solar panel installations must adhere to in order to be considered a 'permitted development.' These parameters include:

1. The solar panels must not protrude more than 200mm from.

If your neighbours do object to your solar panel installation, it's important to try and address their concerns. The first step in addressing any objections.

Can a neighbour object to a solar panel installation?

If your installation falls within certain parameters, your neighbours won't have any grounds to object. However, if your installation falls outside these parameters, your neighbours may have valid reasons for objection. There are certain parameters that solar panel installations must adhere to in order to be considered a 'permitted development.'

Do solar panels affect neighbours?

However, specific conditions and limitations are in place to ensure that solar panel installations do not negatively impact neighbours or the local environment. Neighbours have the right to object to solar panel installations if they believe the installation does not comply with the relevant regulations.

What should I do if my neighbours oppose solar panels?

The first step in addressing any objections is to talk to your neighbours and try to understand their concerns. Some common concerns that neighbours may have about solar panel installations include: Visual impact: Neighbours may be concerned that the solar panels will be unsightly and reduce the aesthetic appeal of the neighbourhood.

Do neighbours complain about solar PV and wind power?

As long as solar PV and wind power have been around, there have been neighbours who complain about them. Whether it spoils their views or makes too much noise, there is always someone ready to complain.

Why do neighbours oppose solar panels?

The location and size of solar panels are two key factors that can lead to objections from neighbours. Solar panels should be sited to minimise their visual impact on the local area and not exceed certain size limitations. For example, solar panels should not protrude more than 200mm (about 7.87 inches) from the roof's surface.

Can solar panels be installed on a listed building?

The solar panels must not be installed on a building that is a listed building, unless the panels are flush with the roof or integrated into the roof covering. If your solar panel installation falls within these parameters, your neighbours won't have any grounds to object.
