

The process of photovoltaic panel installation in the tea garden

Overview

Do solar panels help tea plants grow?

All the tea gardens in the survey agreed that the installation of large solar panels within the garden would not impact the growth of tea plants. The study also revealed that tea estates preferred to adopt solar among the alternative energy sources.

How much space does a tea factory need for solar panels?

The withering area in tea processing factories, for example, can be over 40,000 sq. ft. and can thus provide considerable space for solar panels," Goswami, senior scientist and director at Conservation Initiatives told Mongabay-India. Can agrivoltaics be used in tea gardens?

Agrivoltaics, a method to combine agriculture and solar photovoltaics in the same plot of land, is also being considered for tea gardens. Tea garden managers will have to factor in wildlife movement spaces to sustainably integrate solar installations in such tea estates, note experts.

How long will a solar plant last in a tea garden?

"Given the fact that the total life of the plant is 25 years, this will be a very strong proposition for all tea garden owners to invest in such a solar plant," he said, adding that there are plans of covering 100 tea gardens with solar in the next two years.
