## Overview

---

Can vermicelli of sweet potato be used for post-harvest processing?

At present, only about 30-40% of sweet potato is used for post-harvest processing, therefore, there is just small room to increase of output of sweet potato by relying on producing vermicelli of sweet potato.

What is leafy sweet potato?

Leafy sweet potato is a new type of sweet potato, whose leaves and stems are used as green vegetables. However, sweet potato tips can be affected by pre-harvest factors, especially the intensity of light. At present, intercropping, greenhouse planting, and photovoltaic agriculture have become common planting modes for sweet potato.

Does shading affect the photosynthesis of sweet potato?

Another study revealed that, during the intercropping period, the photosynthesis activities of sweet potato were at a low level, and the total Chl, Chl a, and Chl b increased with the degree of shading, while the Chl a/b ratio decreased [ 41 ].

What are the problems faced by the post-harvest processing industry of sweet potato?

There are some problems encountered by the post-harvest processing industry of sweet potato. They are as follows: single type of the post-harvest technology. Market volume for sweet potato products dominated by vermicelli is almost saturated. Low extraction rate of starch from sweet potato, thus causing much waste of raw material.

Are sweet potato leaves grown under natural sunlight?

Molecules 2016, 21, 745. [ Google Scholar] [ CrossRef] [ PubMed] He, J.; Qin, L. Growth and photosynthetic characteristics of sweet potato ( Ipomoea batatas) leaves grown under natural sunlight with supplemental LED lighting in a

tropical greenhouse. J. Plant Physiol. 2020, 252, 153239. [ Google Scholar] [ CrossRef] [ PubMed].

Why is sweet potato market dominated by vermicelli?

Market volume for sweet potato products dominated by vermicelli is almost saturated. Low extraction rate of starch from sweet potato, thus causing much waste of raw material. New technological process that is better for food safety needs to be improved and popularized.
