6 factors to consider when installing solar systems

1. Location of the house and inclination of the roof .

To know if solar panels are right for you, consider the weather conditions in your area, the slope of your roof, average monthly energy usage, and the length of time you plan to live in your home.

The five main steps to installing a solar panel system include an engineering site visit, permits and documentation, ordering equipment, the solar panel installation, and approval and interconnection.

### How to install solar panels?

1. Make space for the solar panel accessories (solar inverter, cables and solar batteries, if desired), for instance in a plant room
2. Plan a day for installation
3. Erect the scaffolding (this can be done by your supplier or by a company you organise)
4. The solar panel mounts will be installed
5. The professionals will install the solar panels
6. 8.

### Do solar panels need to be wired before installation?

Without fastening them at first, the installers will place the solar panels onto the mounting system. Once the correct angle is achieved, the panels are fastened with bolts. Your solar panel will most likely be pre-wired before installation, meaning that the wiring process can be skipped.

### Is it a good time to install solar panels?

Hopefully you feel more confident about the process of installing solar panels. With 69% of people telling our National Home Energy Survey that they're likely to buy or rent a home with solar panels, now is a great time to go solar.

### Can solar panels be mounted on a flat roof?

For solar panels on a flat roof, mounting systems are slightly different and can

include a triangle 'ballast' box to support the panels. For solar thermal panels (with cells that use the sun's heat to warm water in a house) things are a little different.

Can a solar panel be installed on a south-facing roof?

A solar panel will be most effective if you have a south-facing roof. This will ensure maximum sunlight reaches the panel. You will also have to make sure that your roof can support a panel, and that it has a large enough area for panel installation. Under Permitted Development Rights, you won't require formal permission to install a solar panel.

Can solar panels be installed on a roof?

"The solar panels will need to be mounted on the roof by installers who understand roofing and will need some scaffold decks to safely get the panels to the roof.
