Overview

Is Trinidad ready for more solar power?

Every person involved in the process has certified solar installation training. Didn't know that was a thing in Trinidad, right?

We're definitely ready for more solar power to make a better, more eco-friendly and sustainable world for us all. We understand that solar power is a bit more expensive than other power systems.

What is a solar panel diagram?

Solar panel diagrams are graphic representations of the connections you should make between each PV module and other components of the solar power system, including: Why Are They Important?

Remember the saying, "Measure twice and cut once?"

" Detailed specifications with diagrams for reference help you do that for electronics.

Should a general contractor install a solar PV system?

A general contractor may face a choice between using an electrical subcontractor or a solar subcontractor to install the PV system. A good solar contractor will have the expertise in solar PV systems plus qualified electricians on staff.

How complex are solar panel connection diagrams?

The complexity of solar panel connection diagrams varies widely based on several factors, including: Whole home generator systems with dozens of panels may require plans that resemble architectural blueprints more than simple connection diagrams for a handful of PV modules.

How to install a solar power system?

When you install your Solar Power system, try to position your photovoltaic panels directly under the noontime sun for maximum efficiency from your photovoltaic unit. Before Installation, take care of any obstructions to sunlight. Remove all unnecessary obstructions and items such as branches that may block sunlight to your solar unit.

How to plan a PV installation?

Surface Area: The surface area of the site at which the PV installation is intended should be known, to have an estimation of the size and number of panels required to generate the required power output for the load. This also helps to plan the installation of inverter, converts, and battery banks.
