

## Overview

---

Using a UPS as a backup for a sump pump is not recommended because the battery in a typical UPS is not large enough to run a sump pump continuously for an extended period. A UPS, or uninterruptible power supply, is commonly used to provide short-term backup power for electronic devices. What is a battery backup sump pump?

A reliable battery backup sump pump keeps your pump charged and ensures continuous working during power outages. In this Jackery guide, we will understand what a sump pump battery backup system is, how it works, and how to choose the right power solution for your pump needs.

Can I use a ups as a backup for a sump pump?

Using a UPS as a backup for a sump pump is not recommended because the battery in a typical UPS is not large enough to run a sump pump continuously for an extended period. A UPS, or uninterruptible power supply, is commonly used to provide short-term backup power for electronic devices.

Can a battery backup sump pump run on a 12 volt battery?

A battery backup sump pump requires the use of a deep-cycle battery that's normally sold separately. They come in several forms. Although most emergency sump pumps can run on any 12-volt battery in a pinch, there are some that are better than others for the job. A deep-cycle lead-acid battery with a rating of at least 75 amp-hours is recommended.

How do I choose a backup power system for my sump pump?

The power capacity of a battery is one of the most important factors to consider when choosing a backup power system for your sump pump. UPS batteries provide short-term backup power. They are not designed to provide continuous power for extended periods. In contrast, marine batteries have a much higher capacity and can last much longer.

What is included in a sump pump backup kit?

Includes everything needed to backup your sump pump, including batteries. Provides audible notification of certain events such as running on battery power, low battery, or overload conditions. Increases the AC power and maintains a safe voltage level without switching to battery mode and conserving battery life.

Should you invest in a sump pump battery backup?

Investing in a sump pump battery backup is a smart move for anyone wanting to protect their home and prepare for unexpected events. As we've discussed, these backup systems provide power to your sump pump during power outages, preventing water damage to your home.
