

Uttar pradesh rooftop solar photovoltaic power plant policy 2017

Overview

What is Uttar Pradesh solar policy?

Tell us and we will take a look. Uttar Pradesh Solar Policy was drafted in 2017 and adopted early 2018. The key objectives of the policy are: to increase renewable installed capacity in the state to 10.7 GW by 2020 out of which 4.3 GW will come from rooftop solar (through Solar Rooftop Policy) and 6.4 GW will come from utility-scale PV projects.

Why is Uttar Pradesh establishing solar power based power plants?

Thus, keeping in view vast potential of solar power in the state and to improve the power availability, the Government is keen in establishing solar energy based power plants in the state. To achieve this objective, State Government of Uttar Pradesh hereby declares and adopts Solar Power Policy, 2017. 2. Title.

Does Uttar Pradesh have solar power?

Uttar Pradesh has abundant solar energy for generating solar power [50] and these optimum conditions are present across all months of the year (Table 1) [51]. 3.1. Status and policy development on solar PV in Uttar Pradesh.

Does Uttar Pradesh support decentralised solar PV?

State initiatives and development of decentralised solar PV Since 2013, Uttar Pradesh has prioritised and supported decentralised policy approaches for solar PV with solar projects implemented [52, 64] through the Uttar Pradesh New and Renewable Energy Development Agency (UPNEDA).

Why is Uttar Pradesh promoting renewable power projects?

No major economic activity can be sustained without adequate and reliable source of power. The State of Uttar Pradesh is endowed with vast potential of solar and bio/biomass power and the Government is making efforts to tap these resources to improve the availability of power in the State by promoting

renewable power projects.

How many rooftop solar projects will India have by 2022?

The state government also vide its Solar Policy 2017 has set a target to install 4,300 MW rooftop solar projects, by 2022.
