

Weak current network engineering WeChat name

Overview

This article summarizes the IM message system architecture design of enterprise WeChat, expounds the technical difficulties and challenges.

Enterprise WeChat is an office collaboration product, and chat messaging is the most basic function. The stability, reliability, and security of the message system are especially important. There are many difficulties in the.

The following are the abbreviations of technical terms involved in the content of this article, the specific meanings are as follows: 1. 1) seq: self-increasing serial number, one for each.

As shown above, the overall architecture is layered as follows. 1) Access layer: unified entrance, receiving client requests, and forwarding to the.

The enterprise WeChat messaging model uses a push-pull method, which is highly reliable and simple in design. The following is a sequence diagram of message push and pull:.

What is the IM messaging architecture of Enterprise WeChat?

Thinking and summarizing The IM messaging architecture of enterprise WeChat is similar to that of WeChat, but it faces some new challenges in the to B business scenario. Combining the product form, analysis strategy, and optimizing the plan to ensure the reliability, stability, and security of the message system.

What is Enterprise WeChat?

Technical background Enterprise WeChat is an office collaboration product, and chat messaging is the most basic function. The stability, reliability, and security of the message system are especially important. There are many difficulties in the construction and design of the message system.

What is weak current system engineering?

Weak current system engineering mainly refers to communication automation (CA), building automation (BA), office automation (OA), fire automation (FA)

and security automation (SA), referred to as 5A.

Can weak current engineering system improve working environment in intelligent buildings?

It is believed that with the economic development of China and the improvement of intelligent weak current engineering system technology, people's working environment in intelligent buildings will become better and more convenient. Functions of weak current engineering system in intelligent buildings.

What is intelligent weak current in construction industry?

Among the m, the intelligent weak current related to the construction industry. In the 1970s, the progress in the field of computer automation led to the intelligent weak current engineering system making the construction industry more intelligent. obtained gre at achievements. About 60% of Japanese buildings a re intelligent buildings based o n.

Can weak current intelligent system be used in construction engineering?

Research on Application of weak current intelligent system in construction engineering [J]. Housing and real estate, 2019 (06): 23. Yiqian Zhang. Talking about the implementation and quality control of weak current engineering in intelligent buildings [J]. Chinese and foreign architecture, 2017 (09): 169-171. Chun Wang.
