

# What are the second-tier brands of photovoltaic panels

## Overview

---

'Tier 1 solar panels' are solar panels made by large, reliable solar panel manufacturers. This classification was originally created by BloombergNEF in 2012. It's not a system to judge the quality of solar panels - it's actually a measure of 'bankability,' and is based solely on financial criteria. However, many in the solar industry.

'Tier 2 solar panels' is a term that's used to describe all solar panels that are not Tier 1. BloombergNEF only created criteria used to identify Tier 1.

Tier 1 solar manufacturers are believed to make up no more than 2% of all solar manufacturers in the business. Here are the three differences.

While Tier 1 solar panels tend to be slightly more expensive, we think they are worth the extra cost. Now, we can't say for sure that it will make a difference in terms of quality or long-term reliability, and we can't necessarily say any.

What are Tier 2 solar panels?

'Tier 2 solar panels' is a term that's used to describe all solar panels that are not Tier 1. BloombergNEF only created criteria used to identify Tier 1 solar companies. As such, there are no official lists of Tier 2 or Tier 3 solar companies.

What are the different tiers of solar panels?

Based on how the key components are sourced and assembled, solar panels are broadly classified into Tier 1, Tier 2, and Tier 3. One of the main differences between the different tiers of solar panels is based on the manufacturing process. The more automation the lower the chances of human error.

Are Tier 1 solar panels more expensive?

However, with Tier 1 solar panels, the chances of the solar panels having defects are lower. Tier 1 solar panels are typically 10-30% more expensive than Tier 2 solar panels. Are Tier 1 solar panels worth it?

What are the best solar panel brands?

However, many in the solar industry found Tier 1 lists to be a great way to identify good solar panel brands. In fact, all the best brands of solar panels are either Tier 1 manufacturers right now, or have been classified as Tier 1 in the past. Some examples of Tier 1 manufacturers are Maxeon (formerly SunPower), Qcells, and Canadian Solar.

Should you choose a solar panel manufacturer in Tier 1?

Choosing a solar panel manufacturer in tier 1 doesn't automatically mean you're getting the highest quality or best panels. It signifies that financial institutions have shown confidence in the manufacturer by purchasing their panels.

Should I Choose Tier 1 or Tier 2 panels?

If your project is a significant one, Tier 1 is the way to go. Tier 2 Panels: Now, Tier 2 can be a cost-effective choice. But don't jump in just yet; take your time to research the brands and their warranties. Some Tier 2 options hold their own against their Tier 1 counterparts, but choose wisely. Tier 3 Panels: It's best to steer clear from these.
